**ANDREW M. CUOMO**  
Governor

**HOWARD A. ZUCKER, M.D., J.D.**  
Commissioner

**SALLY DRESLIN, M.S., R.N.**  
Executive Deputy Commissioner

August 12, 2019  
OHIM DAL 19-01

Dear Administrator / Technology Officer:

The New York State Department of Health (Department) is implementing a new notification protocol that providers should use to inform the Department when they have experienced a potential cyber security incident at their facility or agency. The attached document provides the contact information for each DOH Regional Office and is in effect immediately upon your receipt of this letter. This document should also be posted as signage throughout your facility or agency locations for immediate awareness and reference by your staff.

We recognize that providers must contact various other agencies in this type of event, such as local law enforcement. The Department, in collaboration with partner agencies, has been able to provide significant assistance to providers in recent cyber security events. Our timely awareness of this type of event enhances our ability to help mitigate the impact of the event and protect our healthcare system and the public health. The Department has designed a more efficient process to engage assistance for providers, as needed. Therefore, this protocol should be immediately implemented by all providers of the following types:

- Hospitals, nursing homes, and Diagnostic and Treatment Centers
- Adult care facilities
- Home Health Agencies, Hospices, Licensed Home Care Services Agencies (LHCSA)

Providers should ensure they make any other notifications regarding emergency events that are already required under statute or regulation. For example, a cyber security event should be reported to the New York Patient Occurrence Reporting and Tracking System (NYPORTS), under Detail Code 932.

Thank you for your attention to this important activity. Please submit any questions you may have by email to: [ohim@health.ny.gov](mailto:ohim@health.ny.gov)

Sincerely,

Mahesh Nattanmai  
Chief Health Information Officer  
Office of Health Information Management
