# EXAMPLE OF COST SAVINGS UNDER THE HEALTHCARE CONNECT FUND

In this example we'll compare the typical retail costs of a dedicated internet circuit with the costs you'd pay for the exact same circuit under the HCF as a member of the RBHN.

The orange cells are the retail costs. The blue cells are the new costs.

THAT'S A SAVINGS OF 55%,  
OR IN REAL DOLLARS, \$22,372!

Note: Prices shown do not include taxes and surcharges
