

COVID-19 Bivalent Booster and the Flu

With cases of both COVID-19 and flu on the rise, the NYC Health Department urges you to get your residents and staff vaccinated ahead of the winter season. The updated COVID-19 bivalent boosters, which are designed to protect against the new omicron subvariants, are recommended for everyone aged 5 and older. Flu vaccines are recommended for everyone aged 6 months and older.

Please join us for a webinar for updates on COVID-19, the new bivalent boosters, and the flu, on Wednesday, December 7 from 11:00 am to 12:00 pm. Click here [webinar link] to join.

If your facility needs support from Health Department to provide vaccines to your residents, please reach out to Dr. Lih Chang at lchang6@health.nyc.gov.

Date

Tuesday, December 6th

Time

12:00pm to 1:00pm EDT
