MEMORANDUM

TO: RHCF Members

FROM: Patrick Cucinelli, Senior Director of Public Policy Solutions

DATE: October 25, 2010

SUBJECT: **MDS 3.0 Submissions**

ROUTE TO: Administrator, MDS Coordinator

ABSTRACT: CMS provides advice on recent MDS 3.0 assessment submission and processing problems.

Introduction

The Centers for Medicare and Medicaid Services (CMS) has announced that they have corrected the problems with the Minimum Data Set (MDS) 3.0 Assessment Submission and Processing system. The October 20th notice from CMS outlines the steps you should take to make sure your reports and payment claims are correct. For member convenience the notice is reproduced below.

CMS Notice

CMS recently identified a systems problem that resulted in errors in the RUG-III and RUG-IV codes printed on facility Final Validation Reports. Since accurate RUG data is required for billing and other facility operations, the following actions are being taken to correct the MDS 3.0 Assessment Submission and Processing (ASAP) System:

1. **Submission and Confirmation**

The transmission system remains in operation. All providers can continue to submit MDS 3.0 records. After each submission, you will receive confirmation that the MDS 3.0 file has been received. The confirmation page includes a submission ID and the date and time of the transmission. You can print the confirmation and retain it for your records.

2. **File Editing and Final Validation Report Generation Stopped**

The editing of the submission files and generation of the Final Validation Reports has been temporarily stopped pending final testing of the reprogrammed editing and validation system.

3. **MDS 3.0 Files Submitted Since October 1, 2010**

All MDS 3.0 files submitted since October 1, 2010 will be edited. Revised Final Validation Reports will be available in your CASPER shared folder.

Note: The incorrect RUG information may have appeared on any previous Final Validation Report.

4. **Final Validation Reports Release**

The release of all Final Validation Reports, including the revised reports for earlier submissions, is expected to occur by 9:00 PM EDT October 22, 2010.

If you have already submitted MDS 3.0 data and received a Final Validation Report, you will need to check your CASPER shared folder for the revised report for each MDS 3.0 file submitted. Please disregard the old Final Validation Reports and use the revised reports.

Please use the revised Final Validation Reports to verify your RUG III and RUG IV values to ensure your submitted claim for payment is correct.

5. **Late Submissions**

Providers receive only warning messages on validation reports for records submitted late. Since late submission is determined by the submission time stamp, delayed editing and validation processing does not affect whether the submission is late.

The CMS Survey and Certification group has been notified that some MDS 3.0 assessments may be delayed due to this systems problem. The Survey and Certification staff is expected to issue written policy instructions shortly.

jRAVEN - Providers using jRAVEN need to check the CMS website at

http://www.cms.gov/NursingHomeQualityInits/30_NHQIMDS30TechnicalInformation.asp for an updated jRAVEN, which is available now.

Non-jRAVEN users need to check with their vendor for software updates that address the issues identified.

Note: It's recommended that all providers continue to check for software updates on a regular basis.

If you have questions, please contact the QTSO Help Desk at (800) 339-9313 or help@qtso.com. We appreciate your patience during this time.
