

2025 Coastal Storm Planning NYC Healthcare Facility Evacuation Planning Application (Facility Profile Application) Webinar Training – **Recorded Training Session**

Background: The Facility Evacuation Planning Application (FEPA) (previously known as Facility Profile Application) is a planning tool designed to facilitate the development and maintenance of Health Care Facility (HCF) (adult care facility, hospital, nursing home) evacuation planning information related to evacuation and send/receive arraignments needed to make that possible. The FEPA has been modified as an all-hazards planning tool for all of New York State (NYS).

Please Note!!!

The content in this presentation is previously recorded. All requirements apply for the 2025 compliance season. All appropriate portions of the application must be updated for 2025 between January 1, 2025 and March 31, 2025. Please review dear administrator letter and FEPA Users Guide NYC 2025 for additional details.

Goal: To provide adult care facilities, hospitals, and nursing homes with an overview and purpose of the FEPA, This includes 2025 Coastal Storm and Flood Planning Activities requirements.
